PROFILE

I am a full-stack software developer building web applications with JavaScript, React, Ruby on Rails, and Node. I have a background in architecture, an eye for design, and a passion for using technology as a tool in the fight for social justice. I enthusiastically tackle any problem in front of me, and bring strong skills in communication, collaboration, and organization.

TECHNICAL PROJECTS

Monster Money – [GitHub](#) | [Demo](#)

An app to teach financial literacy to teenagers via the care of a monster avatar

- Built front-end using React, HTML, and CSS
- Set up back-end models and controllers using Node and Express.js
- Collaborated with a UX team to implement graphic and functional aspects
- Reviewed and approved pull requests on GitHub

Tr(aid) – [GitHub](#) | [Demo](#)

A platform for members of a community to ask for or offer help during Covid-19

- Winner of the Essteem Equalithon, April 2020
- Built front-end UI components using React and Bootstrap
- Set up back-end models and controllers using Ruby on Rails
- Reviewed and approved pull requests on GitHub

Rita – [Slideshow](#) | [Demo](#)

Prototype for an app that helps caregivers communicate with each other and keep track of appointments, medications, and daily to-dos

- Winner of the “People’s Choice Award” at LYLAS Labs: Women at Work Hackathon
- Collaborated with the team to design and build a prototype
- Managed the team from conception to presentation

EMPLOYMENT HISTORY

Broadnet, Technical Support
